BS ISO 39001 sets out the minimum requirements for a Road Traffic Safety Management System. Governments, road authorities, safety groups and private companies were keen to develop such a standard due to the rising number of people killed or injured on the road each year.

Any company or government body committed to improving its road safety will benefit from BS ISO 39001, but so will every other road user as the approach will make our roads safer for all who use them.

Whether you're new to BS ISO 39001 or looking to take your expertise further, we have the right training courses, resources and services. We offer service packages that can be customized to your business to jumpstart your health and safety management – cutting the cost of services you don't need. A customized BS ISO 39001 package can be designed to remove the complexity of getting you where you want to be – whatever your starting point.

Getting started with BS ISO 39001

We help you understand and apply BS ISO 39001 to your organization for safer working conditions, improved performance and new business opportunities.

To Implementing an BS ISO 39001 system you need to work with us to build a road traffic safety management system that will help you to manage road traffic safety in a more efficient and cost effective way.

Achieve certification and you can ensure you are operating responsibly, prioritize the safety of your employees and demonstrate a consideration to other road users.

The more you invest in it, the more your organization, staff, customers and the general public will benefit.

Our professional training Diploma : Internal Auditor ISO 39001 Road Traffic Safety (RTS) Management Systems

Over three days workshop , led by our experienced instructor, you will develop the knowledge and skills required to undertake a thorough audit of a RTSMS. Using practical exercises, group activities and class discussions, you will be guided through the principles and practices of auditing and how it applies to conducting the audit of an ISO 39001 RTSM System .

A RTSM System based on ISO 39001 can provide your organization with an international best-practice framework for managing road safety risks, evaluating their impact, and developing the capability to achieve results that meet objectives and contribute to the welfare of employees and societal goals.

The framework of a RTSM System combined with robust internal audit processes, can ensure that your organization consistently evaluates its RTS performance, helping to drive continual improvement in an area of risk that can be devastating for those affected by road traffic incidents.

A- Who should attend?

Those tasked with the responsibility for RTS management including:

- Enforcement authorities " Traffic Police "
- Transport planners
- Fleet managers
- Occupational health and safety experts
- Human resources managers
- Road safety managers
- Internal and external management systems auditors and lead auditors who are new to RTSM and leading RTSMS audits
- Existing management system practitioners who are new to RTSM and the requirements of an RTSMST hose interested in finding out more about RTSM.

Develop the knowledge and skills required to undertake a thorough audit of a RTSMS.

B- What will I learn?

You'll learn:

- The key auditing requirements of ISO 39001
- How to plan a RTSMS auditHow to undertake a RTSMS audit
- How to report on the audit findings
- How to conduct audit follow-up and closeout.

Completing this course will contribute 16 CPD points to your learning record.

C - How will my organization benefit?

- There will be an increased awareness within your business about RTS
- Your organization will be able to consistently evaluate its RTS performancelt can help to drive continual improvement in the area of risk which can be devastating to those affected by road traffic incidents
- Your organization can build expertise in supplier/subcontractor (2nd party) and independent audits (3rd party) and how they would operate
- Successful implementation and evaluation of your organization's RTSM System can help to improve reputation and can boost your organization's ability to tender where RTS is a factor during the bidding process.
